Project Smile is an initiative by Kossan International Sdn Bhd (KISB) to develop, sustain, and perceive a good relationship between our internal and external community. Initiated since 2013, Project Smile has extended support and contribution to the environment and communities in need.

It is 100% run by Kossan employees voluntarily. We look at many areas in contribution projects from schools, orphanages to animals, environment and the less fortunate. It is also a program about developing future leaders through social awareness and motivational activities. We believe that children are the hope for a brighter future, and we want to provide them with opportunities and hope for a better life.

Project Smile 25.0 – We care, we help, we can win this!

KISB volunteers have reached out to help the hospitals, schools, and kindergarten by distributing hand sanitizer and liquid hand soap to maintain a safe environment during this pandemic.
Good hand hygiene practices is crucial to prevent the spread of virus. Soap can break down the oily lipid membrane around the virus that keeps it alive with at least 20 sec hand wash each time.

How to wash your hands the correct way:
